DETAILED ACTION

Response to Amendment

Applicant's amendments and remarks received May 1, 2008 have been entered. Claims 1, 5 and 9-13 are currently pending. Claims 1, 9 and 10 have been amended to further distinguish Applicant's invention from the prior art of record. Claims 7 and 8 have been cancelled. Applicant's amendments and arguments are addressed hereinbelow.

Allowable Subject Matter

1. Claims 1, 5 and 9-13 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any subsequent prior art which teaches a document display method, apparatus, and computer-readable medium on which a program is stored for implementing the method in which smoothing processing is implemented when a first determination is made whether a magnification of the document data is equal to or greater than a predetermined display magnification and a second determination is made whether the area of the drawing object displayed in the displayable area is equal to or larger than a first threshold, among additional limitations.

The closest prior art, Izuru Horiuchi (US 5646741), discloses a method to obtain an excellent image quality by smoothing an image based on an enlargement reduction ratio.

Kenichi Sonobe (US 5649034) discloses an enlarged image smoothing method and device in which an image is undergoes smoothing if the image is enlarged “m” times (m is an integral number which satisfies the condition that $m \geq 2$) in the main and sub-scanning directions (lengthwise and widthwise).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
